Abstract: A one paragraph abstract of not more than 200 words must be included at the beginning of the paper. It should be a summary (not an introduction) and complete in itself. The abstract should indicate the subject dealt with in the paper and should state the objections of the investigation. Newly observed facts and conclusions of the experiment or the argument discussed in the paper must be stated in summary form. Readers should not have to read the whole paper to understand the abstract.
